Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: Claims 1 and 10 define over the prior art of record by claiming a steering wheel connector in combination with a steering wheel assembly the connector comprising;

A first member fixed to the rotary member such that the first member and rotary member are relatively rotatable; a second member fixed to the steering wheel such that the second member and steering wheel are rotatable as a unit; an elastic body interposed between the first and second members such that the steering wheel is elastically connected to the rotary member by only the elastic body through the first and seconde members; and relative rotation restricting means located between the first and second members for restricting an amount of deformation of the elastic body upon rotary motion of the second member relative to the first member and also restricting a maximum angle of rotation of the second member relative to the first member.

The prior art of record does not anticipate or render obvious the limitations claimed in claims 1 and 10.

2. The restriction requirement made in the previous Office Action has been withdrawn due to the allowance of claims 1 and 10.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
